Subject: Site Reclamation, Kamp Kerogen, 2-14S-22E

**DIVISION OF
OIL, GAS & MINING**

Dear John:

As we have discussed, we are planning to commence reclamation of retorts #27 and #28.

We have had a number of studies done by contractors relating to reclamation procedures on our in-situ retorts.

Enclosed are the most pertinent of these investigations:

1. 1985 Summary report of research findings on Geokinetics retort #24, by Bland Z. Richardson and Eugene E. Farmer, US Dept of Agriculture, Forest Service, Intermountain Research Station, Logan, Utah. November 1985.
2. Reclamation Plan for Seep Ridge Project, by Mariah Associates, Inc, Laramie, Wyoming. August, 1984.
3. Vegetation Map, Geokinetics Site, 1"=200', by Dr. Erik R. Olgerson, Conifer, Colorado, Feb. 1978.
4. Soil Map, Geokinetics Site, 1"=200', by Eric R. Olgerson Associates, Conifer, Colorado, 1978.

We intend to use the parameters developed by the Forest Service test plots on retort #24 as guides in designing the reclamation of retorts 27 and 28.

Sincerely,

Mitchell A. Lekas
President
